Climate Change Performance Index (CCPI)

- Since 2005, the CCPI tracks countries' efforts to combat climate change.

- Independent monitoring tool of countries' climate protection performance
- Enhance transparency in international climate politics and enables the comparability of climate protection efforts and progress made by individual countries.

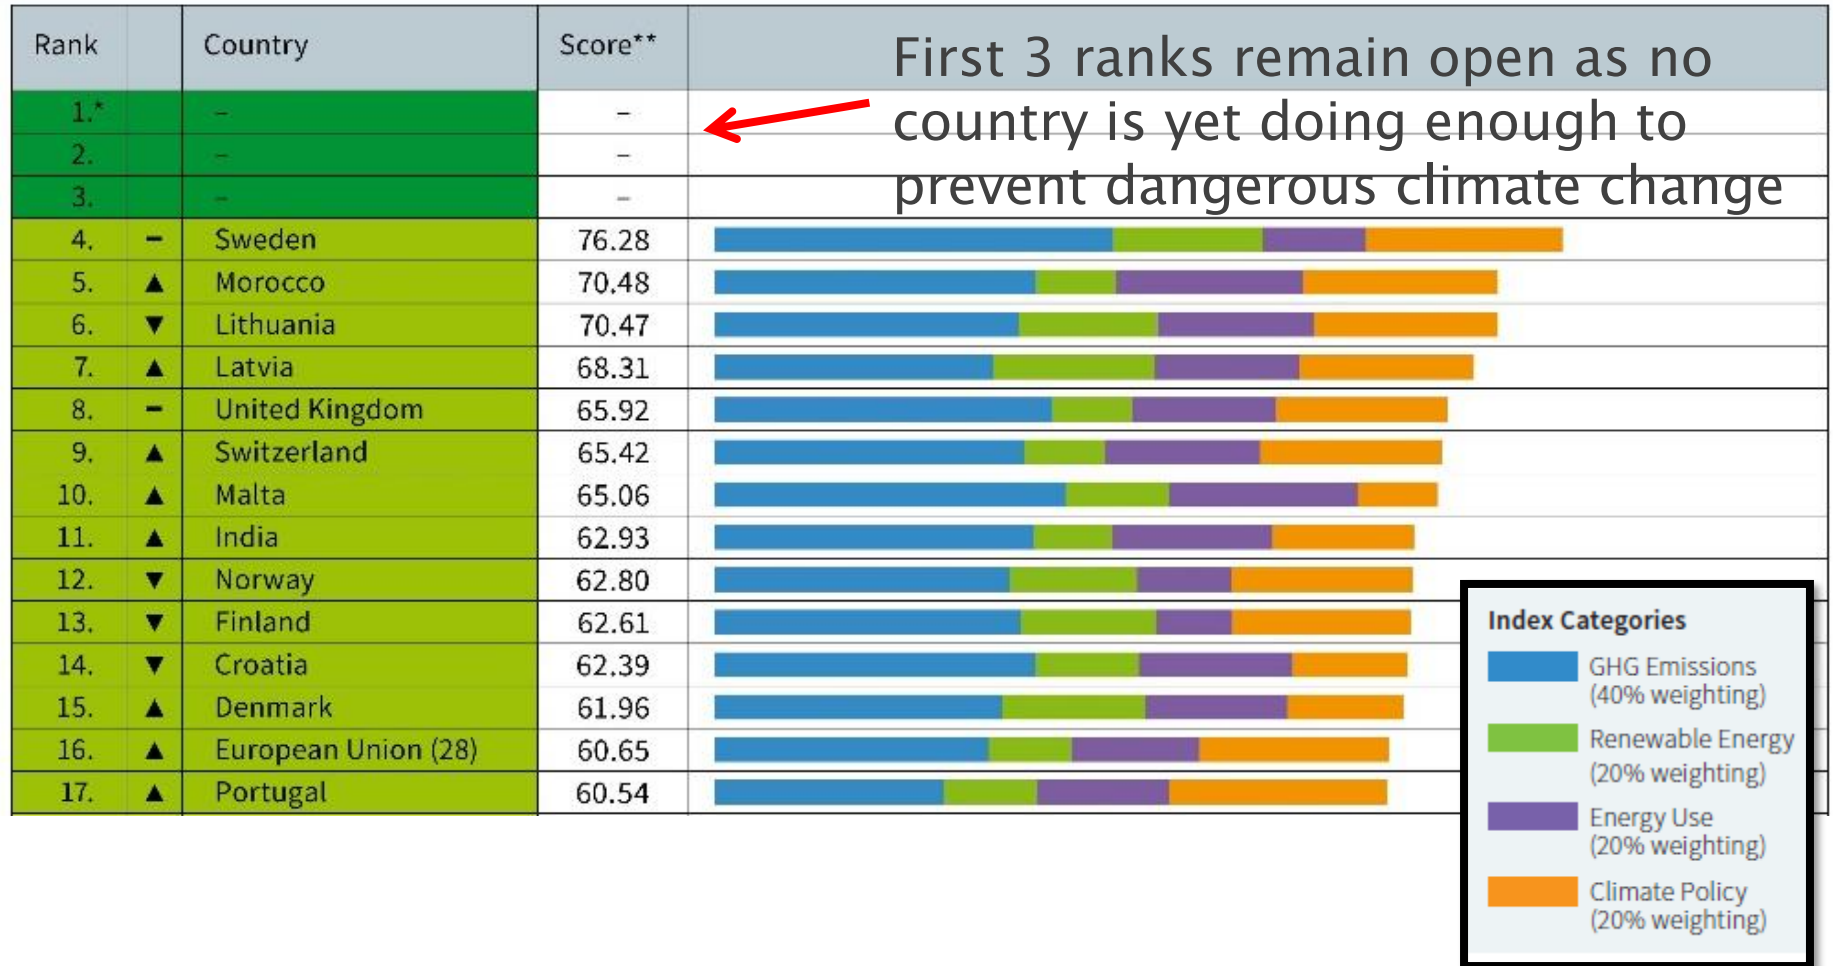

- **Key message:** Countries must raise their ambitions and enact concrete measures to make their individual contributions to implement the Paris Agreement.

Data from IEA, FAO, target calculation and own dataset on climate policy

Challenge – reliable climate policy data

„2019 World Press Freedom Index“ (Reporters without borders. Retrieved from:
<https://rsf.org/en/ranking>)

Challenge – reliable data

- Solution: building a network of 350 national and international experts from NGOs and Universities

Impacts

- Broad international media coverage
- Use of data by universities and research institutes
- Used in education materials
- 100.000 visitors in 2019 at our Webpage

WISSEN & UMWELT

Deutschland fällt beim Klimaschutz weit zurück

Deutschland war vor zehn Jahren Vorreiter beim Klimaschutz, beim Ausbau von Erneuerbaren Energien. Doch inzwischen ist Deutschland weit abgerutscht und global nur noch Mittelmaß.

In Deutschland wächst der Unmut gegenüber mutlose Politik.

Environmental activists protest against fossil fuel during US panel at the COP24 UN Climate Change Conference ... Read More

Katowice (Poland): On a day when top international NGO Germanwatch ranked India at No. 11 in the Climate Change Performance Index (CCPI), TOI has learnt that the country has been clearing coal-based power projects as recently as two months ago. While these decisions may not see any protests, civil society groups came out in full strength on Monday to shame the United States for promoting fossil fuels

Impacts

• CCPI was used in:

- debates in parliaments
- Peer reviewed science
- UNFCCC
- election campaigns
- Enables lobby talks
- Influences investment decisions
